What Did Exhibitors Say?

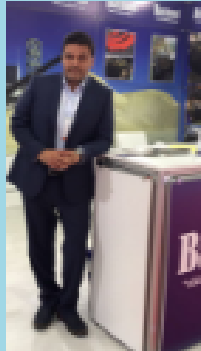

Ata ÖNUÇAK
Ant Group
Mining Eng. Asst. General Manager

There was quality attendance above our expectations

As Ant Group, we are celebrating our 40th year in this sector where we operated since 1976 up until today. We manufacture thickeners used for solid-liquid separation and various filtration equipment used in mining sector with our 40 year of knowledge and experience.

As a matter of fact, we did not have much expectation from this fair considering the mining sector during the past 2-3 years. However, there was great attendance and interest on our stand which pleased us immensely. Our stand was full all day long and very efficient. We used to visit other stands when we had time at the previous fairs but this year we did not have time even for that this year. 90% of attenders consisted of especially companies and persons who were knowledgeable about their field and put an effort in this sector and had novel plans. Therefore, we can state that this fair was very busy and efficient for our company.

We will continue to be here in two years

We are happy to be at the meeting location of our sector, Mining Turkey Fair, as a company supplying conveyor systems and equipment used in all environments requiring bulk material transport in industrial areas.

We attended the fair 2 years ago as well. We are here again to improve our trademark's recognition and to establish new connections. It is pleasant to be with people we serve in the same sector. It turned out to be a good fair where we conveyed our products and services in detail to our visitors and shared their opinions and experiences on their troubles. We would like to take our place at the fair 2 years later.

What Did Exhibitors Say?

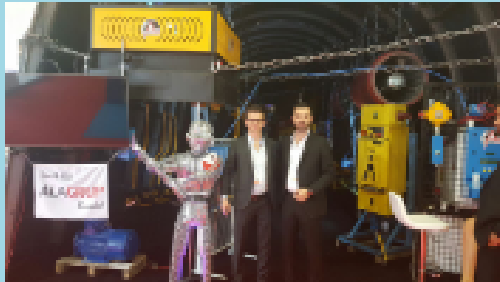

The fair has united national representatives of the sector and world's giants

As Metek, we are one of the most competent consultancy companies in Turkey on well export systems, ore preparation facilities and geological etude and feasibility fields. We offer turnkey solutions according to every need with our expert personnel. Furthermore, our product range includes miner's cap lamps and oxygenated self-rescue equipment. We have attended Mining Turkey Fair since its first year. We are aware of the significance of this fair because it has brought national representatives and world's giants of our sector together.

As Metek Mining, we offer state of the art technologies to mining in Turkey by our business partners in various countries. We are happy to introduce our products and services to the sector representatives at this Fair. We would like to thank to everyone and each institution which put an effort in organization of this fair, which contributed considerably to the progress of mining in Turkey.

Every company in the sector should attend this fair

Alagrup corporation was founded in 2010 and is engaged in supplying equipment for underground mining especially coal mining. Alagrup deals with supplying whatever is needed in an underground coal mine.

I think that every company who operates in this sector must be at this fair. We are very happy to be here. We are glad to host new investors and our customers here. I can say that the fair has met our expectations. Especially the year 2016 has passed very troubled for the mining sector however we can understand that this problem is getting over gradually based on the vitality of the fair. I can say that the fair is going very well for us.

What Did Exhibitors Say?

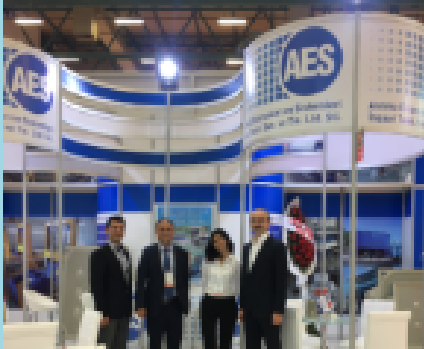

Tolga SENCER
Talpa
Asst. General Manager

Vitality in the sector is obvious at the fair

We are a company engaged in manufacturing underground mining machinery and we work on loaders generally.

We are happy about the fair up until now and there is interest and it is going very well. I think that the fair is beneficial for the sector. We see that there is vitality in the mining sector this year due to the increases of commodity prices and we see the impact of this on the fair. There is intense interest on our machinery and we think that we will achieve good results if it goes on this way next year. The fair has met our expectations absolutely. We thank everyone who put an effort.

Ertan KARAHAN
AES Aritma Ekipmanları Ltd. Şti
Technical Manager

The fair has replenished our hope for the future

As AES, we operate in only filter press manufacturing for approximately 16 years. We have manufactured and operated nearly 750 machineries successfully in Turkey and 29 countries in the world for 17 years.

We have been attending the Mine Fair for many years and continuously. We regard this fair as an important meeting location for the sector. Despite we are going through a tough process as the sector and market, we can say that we are happy about this year's fair. This interest on our stand and Mining Fair made us look forward to the future with more hope as a manufacturer. We had the chance to talk and discuss the projects of both our current customers and potential new customers. We have introduced our new products that we designed specifically to the mining sector.

We are happy about the feedbacks we received

Our company is a 126-year old Germany company manufacturing job safety and equipment. We have nearly 19-20 R&D locations throughout the world and operate in 191 countries.

We are happy about the fair in general since there is no other fair held in Turkey uniting the mining sector like this. Therefore, we are happy about attending here and the feedbacks. This activity, organization is significant for improvement of mining in Turkey and to carry it to higher levels. We wish that many more are held. We hope that this fair grows even further and becomes a more developing fair in the following years.

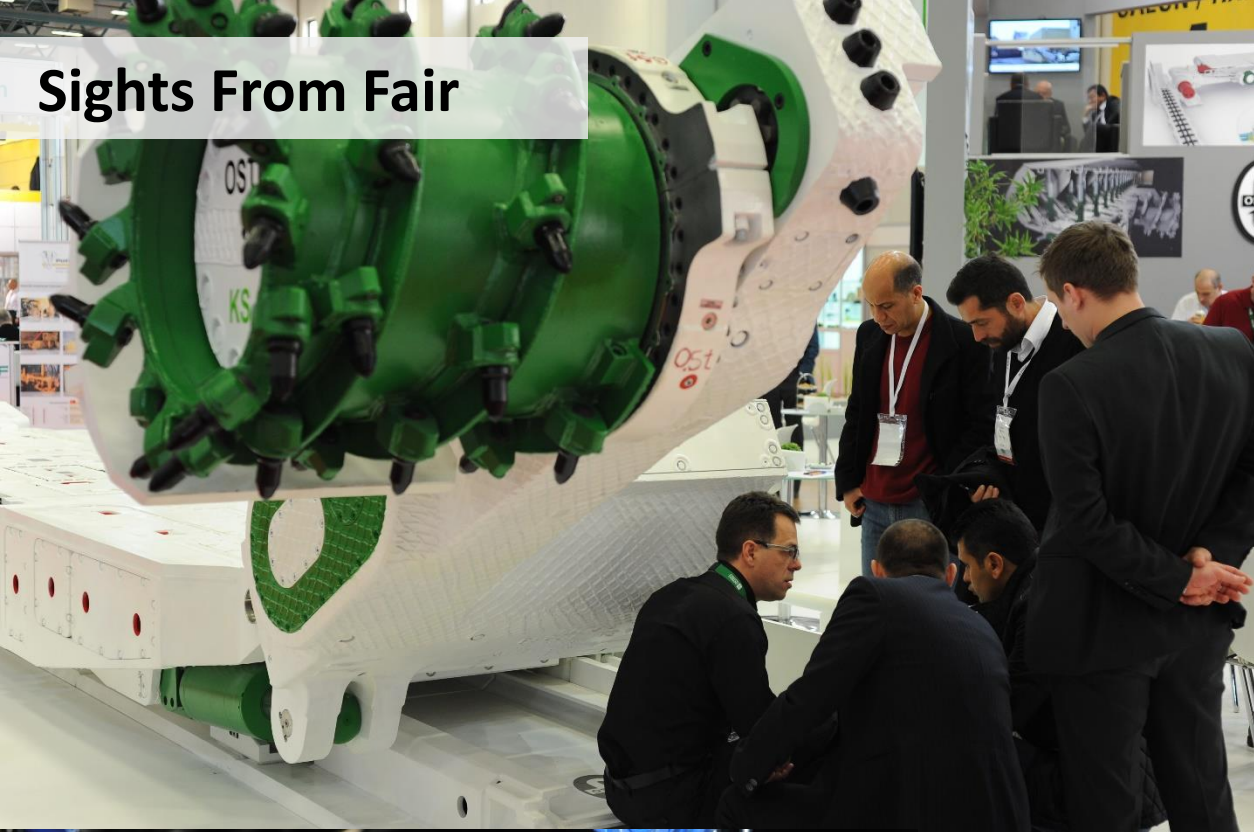

Ali Arda AKSOY
AKSA Magnet
Mining Engineer

The fair has offered us many opportunities

AKSA Magnet Industrial Products Industry and Trading Co. manufactures machineries and specific systems and establishes complete turnkey facilities for mainly mining, industrial and raw material sectors and food, chemistry and recycling industries and many fields. Our products are in a very wide range. We are able to establish turnkey mining facilities completely including breaking, milling and sifting, classifying, dewatering and drying and obtaining concentrated high-grade ores. We export our products to 42 countries. The mining sector had entered into a standstill period recently and the demand on facility investments had decreased considerably based on economic and political reasons. On the other hand, the mining sector has progressed immensely technologically and in terms of quality in comparison to the previous years. In this sense, Mining Fair Turkey 2016 has offered important opportunities for manufacturers. Our communications with our investors have caused introduction of our company and products to our potential customers and provided us many more opportunities. Visitors from many countries attended and our companies had the chance to introduce themselves better. The fair has functioned as a bridge between the manufacturers and investors in this respect. I would like to thank everyone who put an effort and served at Mining Fair Turkey 2016.
