

## **Mining Industry Will Come Together for the 10<sup>th</sup> Time at Mining Türkiye Fair**

### ***With Its Large Scope The Fair Will Be The Platform Where Everyone Can Find What They Are Looking For***

At the fair, products and services will be exhibited under the main headings of selection, identification and demarcation of mine site, preparation of the surrounding areas and work sites of the mine site, ore extraction, ore preparation and enrichment. The fair offers to examine all kinds of products and equipment from drill rig and equipment to cutting-loading-conveying machinery and equipment, from geological survey equipment to drilling machinery and equipment, from grinding-crushing-screening-sorting machinery and equipment to chemical enrichment materials and equipment, from occupational health and safety equipment to generators, electric motors under one roof.

### ***The Success of 2021 Will Increasingly Continue in 2022***

The fair visited by Deputy Minister of Energy and Natural Resources Prof.Dr. Şeref Kalaycı on the opening day in 2021, hosted 409 exhibitors from 28 countries and 11.488 visitors from 57 countries. At the fair, which continued its steady growth, domestic and foreign companies and visitors had the opportunity to establish new collaborations, strengthen and develop existing collaborations.

Mining Türkiye Fair supported by the Ministry of Trade of Republic of Türkiye and KOSGEB in 2021, proved once again that it is the one of the most important Trade platforms in the mining industry.

### ***The Ministry of Trade of Republic of Türkiye Supports the Mining Industry***

The mining sector, which provides an important input to industrial production, is an important building block on the basis of economic development.

Deputy Minister of Trade Rıza Tuna Turagay said “In order for our country to achieve its future goals, the success of all our sectors in exports is extremely important. The mining industry, which broke the historical export record of the republic with \$5.9 billion based on the data we have available as the Ministry, had a productive year in 2021. As the importance given by countries to sustainability increases, the production of critically important minerals and rare elements gains the value. At this point, we can show natural stones as the mines of the future. As the Ministry, our biggest goal is to produce end products and products with high added value. We have to do this entirely with our own production. The more we transform our mines into end products, the more likely we will be successful. As the

Ministry, we are here to provide all kinds of support to pave the way for the mining industry.” in his speech at 4th Mining Workshop.

**Booking is Available Now!**

Mining Türkiye 2021 Fair received good marks from all its stakeholders and for the 10th edition of fair, the preparations started without waiting.
